

About Us

WETS is a Texas-based company established in the year 1976. WETS offers water treatment for municipalities and industrial sectors.

WETS designs, fabricates, and commissions water treatment plants using conventional methods.

WETS offers custom products to clients and an extensive pilot study at the well site to understand the exact chemistry of the problem. Our products are simple to operate and stand the test of time.

Our “built-to-last” approach offers low maintenance and reduced operating costs that will maximize your return-on-investment.

**EXPERT IN
TREATING
POTABLE WATER**

FOR MUNICIPALITIES AND
INDUSTRIAL SECTORS

OUR STRENGTH

More than
45 years of experience
and served more than
600+ customers in the
municipalities and
industrial sector

Products & Services

- Aerator unit
- Gravity and pressure filter
- Cooling tower
- Filtration and aeration rehabs
- Ion exchange systems
- Pilot studies
- Engineering solutions
- TCEQ documentation

Areas of Expertise

- Arsenic removal
- Color removal
- Hydrogen sulfide (H₂S) removal
- Iron and manganese removal
- Methane stripping
- Radon and radium removal
- Trihalomethane (THM) removal
- Uranium removal

Our Attributes

- Consistency in quality products
- Superior subject knowledge
- Corrosion proof and seamless filters and aeration unit designed to meet NSF code requirements
- Made in the USA

Pilot Study

Pilot study at the site to consider various treatment options
